

A connected Transport Service **Operating Around the World**

Welcome!

Editorial

Join us!

Who can join?

Strategic Partners

Strategic Alliance Partners represents companies with business engagements in minimum two continents, within the industries of manufacturing coaches, tire, fuel, rebuilds, coach technology and spare parts.

Alliance Partners

Alliance Partners represents companies providing products and services ranging from parts, software, technology solutions, special equipment, coach advertising and lubricants to the coach industry.

Affiliate Partners

Affiliate Partners represents companies from the coach industry, associations or organizations providing meetings, incentives, congresses, events, services, coach trade influence, lobby activities, unions, visitor centers, tourism federations, conventions, and chambers of commerce.

Supporters

Companies, associations, organisations and privates with a proffessional interest in the coach industry.

Dear reader.

My name is **Alexandre Delvallez** and I am the Chairman of the Partnership Committee of **Global Passenger Network (GPN)** and the General Manager of Saybus – GPN France.

GPN is a non-profit organization that is comprised of members and partners.

Our members are coach operators from different countries around the world that focus on providing high quality transportation services. Today GPN has members in 42 different countries around the world and we are constantly expanding our network.

Our Partners are well-known, innovative companies that are essential suppliers of the members of GPN (coach operators). They play a key role in the quality of services that GPN members provide in their respective companies.

The involvement of Partners in GPN is a real opportunity for the members because it brings richness to our business. The partners are professionals of the coach industry and we do not operate at the same level. Like a chef and a waiter, they both work in the same restaurant but do not have the same role however, they are both essential.

This closeness with partners is an excellent way to build the future of global passenger transport market because they ask about our needs and create innovations to make operators stronger and more efficient.

Each of us, in our own countries, we negotiate with suppliers whether they are manufacturers or equipment companies. At GPN, partners and members can all sit together around the table and find more interesting global agreements, agreements that would not be possible to obtain individually.

Come and join GPN network, join the wonderful family.

We hope to welcome you to our family soon!

Companies with business engagements in two or more continents within the industries of coach manufacturing, tyres, fuel, rebuilds, coach technology and spare parts.

DAF

www.dafcomponents.com

DAF is one of the most successful commercial vehicle manufacturers in Europe. Next to the production of first class trucks we are providing products and services for the Coach and Bus industry. DAF components division is dedicated to support this business area and closely working together with our C&B partners, like VDL and VanHool. Our high quality driveline products, supported by service professionals, will provide high uptime and low operational cost and drives your profitability. Furthermore our product characteristics enables a smooth, quiet and sustainable driving performance. No need to say that for those reasons DAF driveline products can be found in several C&B brands: Pure excellence.

DAIMLER

DAIMLER

www.evobus.com

Since the amalgamation of Mercedes-Benz and Setra in 1995 under EvoBus, they have become **the leading full-line supplier on the European bus and coach market** and are also present on the global market. Mercedes-Benz invented the coach and has more than 100 years of experience in the bus and coach industry. Along with Setra, also a brand with tradition, both are well-known as pioneers in the bus and coach business. With these two brands, we – integrated into the Daimler Group – offer our worldwide customers a unique, wide-ranging product portfolio.

FERDIA

Ferdia transforms the charter bus industry by making it easy to travel together. Charter buses offer a green and social way of travelling. But at any given time, the majority of bus seats are empty, and people keep taking their cars. Why? Because finding, booking and coordinating bus services is a hassle.

Ferdia changes this. Our unique two-sided market platform streamlines bus company processes and provides convenient travel services. Our bus partners get higher utilization and margins through efficient operations, new services and digital sales channels. The travellers get convenient booking and a choice of innovative mobility solutions.

The Ferdia ecosystem benefits travelers, bus companies and the environment. It's a win-win-win

The company was founded in 2016 and is headquartered in Oslo, Norway.

GREEN ENERGY

www.solarbus.pro

Solar Bus Pro is part of Green Energy Scandinavia A/S with headquarter in Denmark.

We operate subsidiaries and dealers in several countries. Packaging and deliveries of MIPV sets for busses and coaches are handled through the central warehouse for Europe based in Vejle/Denmark. This is also the location of our technical support, sales office and customer service.

The company is based upon a long experience in solar cell technology - specially on the CIGS technology which has unique properties that perform well under conditions such as low light intensity, shadows and high temperatures.

The implementation of solar energy on vehicles is the main business model. Our company is proud to be among the world leaders in technology for controlling solar energy on vehicles. The company provides solar cell solutions for use in severe or extreme conditions where only the best equipment can survive. We have a long track record and references within all kinds of transports.

Other trademarks of the company are solarcamper.pro, solarvan.pro solartruck.pro, solarboat.pro and solarship.pro. Please visit www.mipv.pro for our entire product line.

IVECO

www.iveco.com

IVECO BUS is a brand of Iveco Group N.V., a global leader in commercial and specialty vehicles, powertrain, and financial services, listed on the Borsa Italiana in Milan.

A major player in the field of public transport, and among the leading bus and coach manufacturers in Europe, IVECO BUS designs, manufactures and markets a broad range of vehicles that meets all the needs of public and private operators:

- school, intercity and tourism coaches;
- standard and articulated city buses, including BRT dedicated versions; city midibuses
- minibuses for all passenger transport missions.

IVECO BUS benefits from a strong expertise in alternative energies vehicles and is now capable of offering a complete range running on compressed natural gas – fully compatible with biomethane

- and in the electromobility field, to suit every kind of transport need. Thus, IVECO BUS positions itself as a reference partner to face the numerous challenges of sustainable mobility.

IVECO BUS employs over 6,000 people across four production units, in Annonay, France, Vysoké Myto, Czech Republic, Brescia, Italy and in Rorthais, France with its electromobility center of excellence.

The extensive IVECO BUS and IVECO service network guarantees assistance around the world wherever an Iveco Bus vehicle is at work.

ZWINQ

www.zwing.com

Over the last few years, Zwinq has evolved into a market leader in the area of fleet and fuel management. Our drive has led us to become the **frontrunner in our field and this means we come up with creative and innovative solutions for our customers**, where data, energy and efficiency are key. We offer solutions for retail fuel stations and for companies who manage their private (homebase) fuel stations.

Our solutions help our clients monitor and optimise the management processes of their fleet and (fuel) stations. We are able to significantly improve the operational efficiency of our clients by integrating dataflows and data sources of fuel or energy transactions and by managing their fuel stations in our platform. Our innovative solutions enable correct, accurate, and timely reporting, without human interaction. Gain insight into the cost of ownership, sustainability KPIs (like your carbon footprint), fuel savings and many other KPIs of your fleet(s). These insights help fleet managers to improve efficiency and to increase control, which can lead to cost reductions. With all data easily accessible through our APIs, our clients and partners can incorporate this data in any other processes or systems (e.g. ERP or accounting solution).

Companies from the coach industry, associations or organizations providing meetings, incentives, congresses, events, services, coach trade influence, lobby activities, unions, visitor centres, tourism federations, conventions, and chambers of commerce.

FIRST TRAVEL SOLUTIONS

www.firsttravelsolutions.com

FirstGroup PLC is one of the leading multi-national transport providers in the World, with over 117,000 employees worldwide, four rail franchises and a substantial North American presence. In the UK alone we carry around two and a half million bus passengers a day.

First Travel Solutions (FTS) is a stand-alone business within the Group. Whilst the business was created to provide road transport for rail replacement operations, it has more recently used the structure and scale of the business to offer a similar managed transport product to clients in the MICE, Events, Festivals and corporate travel sectors.

FTS is not just a broker. We plan and manage transport with much of our emphasis being on pre-event planning, scheduling, risk assessment, procurement and then « on the ground » management.

We also work with carefully selected partners to provide advice and assistance with crowd management and security, traffic management and site planning.

FTS is fully certified to ISO standards- 9001 (Quality Management);

14001 (Environmental Management, and 18001 (Health and Safety Management Standards)
More information can be found on our website.
